

ALL SIGNS FROM THE REVOLUTION

PUBLIC CONVICTION OVER KOWALSKI

Death of Springstead and Awty Not Requite by Execution

Guard Placed in Jail As Precaution Against Attack

An intense feeling of indignation over the horrible crime committed by the condemned murderer Kowalski at the city jail on Saturday morning, and a realization of the utter inadequacy of the law to meet the demands of the public, were displayed by the people of Hamilton generally yesterday, and today when the body of the late George Springstead, a city constable, and the body of the late Arthur Awty, a city constable, were taken to the city jail on Saturday morning.

One of the officers of the local police, a man of long service and mature judgment, declared that Kowalski was taken to the city jail on Saturday morning, and that he was a man of the most desperate type, and that he was a man of the most desperate type, and that he was a man of the most desperate type.

GUARDED AGAINST SURPRISE. Soon after the tragedy on Saturday morning, Sheriff Middleton was warned that an attempt might be made to release Kowalski from the jail that night.

DEATH OF ARTHUR AWTY. Chief Turney Arthur Awty, the second victim of Saturday's tragedy, died at the city jail on Saturday morning, and was taken to the city jail on Saturday morning.

DEATH OF GEORGE SPRINGSTEAD. Chief Turney Arthur Awty, the second victim of Saturday's tragedy, died at the city jail on Saturday morning, and was taken to the city jail on Saturday morning.

WORST STORM IN YEARS DID GREAT DESTRUCTION

Many Thousands of Dollars Lost Through the 24-Hour Visitation.

Fortunate That There Was No Loss of Life In This City.

One of the worst storms that has swept this city for years struck Hamilton shortly before eight o'clock Saturday night. The wind attained a fearful velocity, and continued with great force until nearly dawn of Sunday.

Speaking on the subject of overhauling signs, Chief Whalley referred to the Times in the Building Inspector's office.

TO ST. ANDREW'S VOCATIONAL THERAPY FOR CIVILIANS, TOO. Scottish Society at St. Paul's Presbyterian.

One thing that modern business methods have done much to promote, and that is truth, said Rev. D. D. Drummond, speaking at St. Paul's last night on the occasion of the annual service for St. Andrew's Society.

Public Will Surely Support It When They Learn the Facts. Encouraged by the splendid results which have followed the introduction of vocational therapy among the soldier patients at the Mountain Sanatorium, and profiting by the experience so gained, the authorities of that institution have introduced the system among the civilian patients, and are already seeing good results.

Imported Castle Soap. We have now had a shipment of genuine imported Castle Soap. It is made from pure olive oil, is very soft, and is a very good soap for sensitive skins.

The Best Pipe Tobacco. You will never know the enjoyment of a perfect smoke till you have tried the extra special smoking mixture, which is sold in the large tins for 10¢ at every cigar store, 39¢ a tin at the factory.

STEAMSHIP ARRIVALS. Montreal, Dec. 30. -- (By the Associated Press.) The steamship "Cape Horn" arrived at Hamilton on Saturday night.

## HOW C.P.R. ENGINEER WON VICTORIA CROSS

It fell to the lot of a C.P.R. engineer, Mr. John Peter Robertson, to win the much coveted Victoria Cross at Passchendaele. Robertson, enlisted at Lethbridge with the Irish and was an engineer on that division. He was better known as "Pete" to his Lethbridge friends. He was born in Pictou, Nova Scotia, but lived most of his life in Medicine Hat with his mother, Mrs. Alex. Robertson. Robertson was aged thirty-four, won his distinction in connection with operations at Passchendaele, November 6, 1917. Details came through authoritative channels that during his battalion's attack Robertson's platoon was held up by snout fire two hundred yards from the final objective. Our guns were still busy cutting a way through the wire when a German machine gun opened fire and inflicted very heavy losses on the Canadians. Robertson, without waiting for orders, rushed forward on his own initiative, defying the machine gun's whistling fire. Moreover, our artillery barrage was so intense that death seemed almost certain. Working his way to the flank, he eventually found an opening in the wire, got through and crawled until the end of the

emplacement was reached. Then suddenly to his feet he charged down on the astonished Germans and killed four of the gun crew before they could recover from their surprise. The remainder fled in terror, but their flight was soon cut short when Robertson seized the abandoned gun, screwed it around and poured a hail of bullets upon the backs of the fast disappearing enemy. Several of them fell victims to their own weapon and others were caught by our shells. When the remainder of the platoon arrived Robertson was still firing the captured gun. It was entirely due to his heroic action that the whole line was enabled to advance and capture the final objective. Robertson was rewarded with the first wave, taking a gun with him. He used it very effectively to keep down the fire of German machine guns and snipers, while his platoon consolidated the new position. Fair in the day when two or our snipers who ventured in front of our lines were wounded, Robertson volunteered to bring them in. He went into the open, although exposed to a heavy enemy fire, lifted one man on his back and carried him safely to the trench, and immediately returned to the second man, slugging back with his unconscious burden while the bullets whistled around him. But as if cruel fate were waiting until the last possible moment to overtake him, he was killed on the very parapet of the trench, his mission almost accomplished. His splendidly heroic end, like his dashing work done earlier in the day, had a most inspiring effect.

MR. PETER ROBERTSON WHO WON THE VICTORIA CROSS

## Grove's O-Pen-Trate Salve

### Opens the Pores and Penetrates

A Remedy for Chest Colds, Head Colds, Sore Throat, Stiff Neck, Earsache, Spasmodic Cough and kindred ailments. Apply freely to the skin just over the affected parts and rub it in.

## GROVE'S O-PEN-TRATE SALVE

### is also an Excellent Germicide for the Nose and Throat.

It should be applied to the nostrils so that you will be continually inhaling the vapors while in the presence of people who are sick with contagious diseases, or when you are entering crowded cars or other public places during an epidemic of Grip or Influenza. Any Grip or Influenza germs breathed through the nose are destroyed by this germicide salve before the germs can reach the throat.

### FOR THE SICK

Place One Level Teaspoonful of GROVE'S O-PEN-TRATE SALVE in a hot saucer in the sick room. The Antiseptic Vapor rising from the heated salve makes breathing easy for the patient. It induces sleep and is a great comfort to anyone suffering with Spasmodic Cough, Asthma, Bronchitis, Sore Throat, Coughs, Colds, Whooping Cough, Diphtheria or Pneumonia. The Healing Effect of the Vapor relieves the patient and is very comforting. Price 35c per box. If your Druggist hasn't any, send 35c in postage stamps to Paris Medicine Company, 193 Spadina Ave., Toronto, and a full-size box will be mailed to you promptly.

### taken advantage of the warning of the falling barometer.

### TELEPHONES BADLY USED.

The telephone system was the worst demoralized of all lines of communication, the long-distance connections having been severely damaged by falling trees and flying branches. A number of poles were swept away on the Beach road as the wind whirled along the Oakville line. Salt and Woodcock will be tied up more or less, as far as long-distance communication is concerned, for the next 24 hours, when repairs will be effected, explained the management to the Times today. A cable on the Galtfield exchange in the west end, with a mishap, which puts it out of commission for the time being, but which is undergoing repairs. The men of the line have worked like heroes during the storm to maintain connections, and it is due to their unflinching efforts that things are no worse than they are.

### SOME INCIDENTS.

There were many peculiar incidents in connection with the storm. One, told by Chief Tenkay, was that a mining auto became entangled in wires connecting the light and power with the City Brass Works, on Cannon street west. The auto driver was entangled in the wires, and until he had a deafening crash behind him, when he saw that he had pulled the entire front of the building out to the street.

The firemen were called to several transformer fires, which were outside the jurisdiction of the department. One fire broke out on a roof of a cottage in the west end, which, if they had been charged at the time, would have burned the cottage speedily. As it was, the fire broke out, a considerable distance from the scene of the accident.

Flinters, grocery store, on Maple avenue, suffered considerable damage by the falling of brick and debris when the storm broke. The store was a two-story building, and the debris fell from the roof. The store was a two-story building, and the debris fell from the roof. The store was a two-story building, and the debris fell from the roof.

The street car service of the city was not interrupted. Traffic was maintained on the line this morning, but it was impossible that the schedule could be carried out. No fatalities have been reported. All other suburban lines as well as the city lines were not interrupted.

## Music AND Drama

Another large and appreciative audience greeted the performance of the company at the Grand Opera House on Saturday night when Gilbert & Sullivan's captivating "The Mikado" was given. The fact that a high wind was raging, accompanied by rain, with street lights off and the street railway tied up, resulted in many ticket-holders, not reaching the house until quite late, but by 8:45 o'clock the house was filled to capacity and the curtain rose on a performance that was over by 11:10.

The cast was practically the same as that which presented the opera when the company appeared here a week or so ago. The principals were better, if anything, and were well received. Jefferson De Angelis, who scored a triumph in "The Mikado," and so did Albert Parr as the Mikado. Some of the other principals were also excellent, and the orchestra was a genuine treat in itself. From what was gathered, the company is a well-organized organization of Mr. Gaillo's going to a performance at the Grand Opera House on Saturday night. The company is a well-organized organization of Mr. Gaillo's going to a performance at the Grand Opera House on Saturday night.

date our newly won positions, and we must be ready for the next great visitation.

Reverals of the early days, like Pentecost, must break out again in the world. The twentieth century revival is coming for the spreading of the Gospel. The church recalls that mankind demands it. Conditions are ripe for the greatest revival. Let us prepare our own hearts, and the churches and the world will be ready for the great revival.

Characteristic of every Pentecost is the quickened and intense realization of God. For the past ten or twenty years, we have not always been conscious of God in the midst of our lives.

The world is crying out for God as never before. God's people are crying out for Him. The world is crying out for God as never before. God's people are crying out for Him.

DR. GILMOUR HERE

The aims of the Baptist Forward Movement were ably set forth in Hugh Stinson Baptist Church yesterday morning by Prof. J. L. Gilmour, D.D., of MacMaster University, who was formerly pastor of James Street Baptist Church in this city.

A stirring appeal, on behalf of the Baptist Forward Movement, was made by Rev. John MacNeill, B.A., D.D., of Toronto, speaking yesterday morning at the convocation of James Street Baptist Church.

### WORST STORM IN YEARS

#### DID GREAT DESTRUCTION

(Continued from page 1.)

Persons of the theatre received a great scare when lower timbers and beams of the building were blown away, and the roof crashed down, the roof falling in a storm. A lady in the back seat of a car was killed.

"I was going down James street to a little when a big black cloud came over the sun and the sky turned black. The Ford began to rock like a ship in a storm. A lady in the back seat of a car was killed."

"I thought it was time to get out, so I jumped into the street and ran. I was going down James street to a little when a big black cloud came over the sun and the sky turned black. The Ford began to rock like a ship in a storm. A lady in the back seat of a car was killed."

"I had just been there about a minute when the lumber from the Sun Star building began to shoot through the air like flying bullets. I was going down James street to a little when a big black cloud came over the sun and the sky turned black. The Ford began to rock like a ship in a storm. A lady in the back seat of a car was killed."

"At the same moment the wind caught the skirts of a woman crossing the street in front of the theatre, and she was pitched head first onto the curb, rolling over and over until she lay face down in the gutter. The theatre entrance, where the alarm was given, was a scene of confusion and hurry out of the house."

"I decided I would be in that race, and I ran. The fleeing crowd crossed the street to the shelter of the Royal Market. It is a wonder that people were not injured, but no one was hurt. Many on the frightened street were not injured, but no one was hurt. Many on the frightened street were not injured, but no one was hurt."

On the Mountain. Many Hamilton residents feared that their homes would be blown over the roof. With the wind coming from the west, blowing at the worst the mountain was a wild spot. Many fine trees were blown down, and the roof of the mountain was a wild spot. Many fine trees were blown down, and the roof of the mountain was a wild spot.

### THE ARCTIC TERN.

Birds are Greatest Daylight Savers in the World.

The greatest daylight saver in the world is the Arctic Tern. Many years before the Cluney bird was known, it was known to a scheme to utilize the extra hour of daylight. The Arctic Tern had discovered that it was possible to open up half the year in regions where the sun never sets. It did the same thing, and this is how the Arctic Tern has its name.

It has its summer home in the north, and its winter home in the south. It is a bird of the Arctic, and it is a bird of the Antarctic. It is a bird of the Arctic, and it is a bird of the Antarctic. It is a bird of the Arctic, and it is a bird of the Antarctic.

# FARM AND GARDEN

## CURING MEAT ON THE FARM.

Curing meat on the farm is a matter worth considering. The satisfaction and convenience of having the home larder supplied with well cured meat for the winter, is a matter of no small importance. At present prices charged at butcher shops and the price farmers receive for their cattle, sheep and hogs and buy the fresh meat at retail.

### ANIMALS FOR MEAT.

Not only should high quality pork and bacon be raised, but every farmer should have a beef or two during the year for home use. There are excellent animals for fresh meat, it will not come ordinarily to feed a few hams, as there are plenty of pasture land at the farm and the price farmers receive for their cattle, sheep and hogs and buy the fresh meat at retail.

### CURING MEAT ON THE FARM.

The first essential to be observed in the successful preserving of meat is the proper curing or cooking of the carcass before slaughter. The ideal temperature for curing is from 50 to 60 degrees Fahrenheit, and the meat is allowed to hang in the smoke for a few days. If the meat will spoil, while hanging at any time, it should be cooked. When the meat is ready to be cured, it is placed in a large enough box to hold it, and the meat is placed in a layer of salt and sugar. The meat is then placed in a large enough box to hold it, and the meat is placed in a layer of salt and sugar.

The meat is then placed in a large enough box to hold it, and the meat is placed in a layer of salt and sugar.

### CURING MEAT ON THE FARM.

The first essential to be observed in the successful preserving of meat is the proper curing or cooking of the carcass before slaughter. The ideal temperature for curing is from 50 to 60 degrees Fahrenheit, and the meat is allowed to hang in the smoke for a few days. If the meat will spoil, while hanging at any time, it should be cooked. When the meat is ready to be cured, it is placed in a large enough box to hold it, and the meat is placed in a layer of salt and sugar. The meat is then placed in a large enough box to hold it, and the meat is placed in a layer of salt and sugar.

**Will start you in Our Christmas Banking Club**  
next Xmas you get  
**\$67.50 or \$127.50**

**PLAN OF THE CLUB**  
The Plan is Simple: You begin with 1c, 2c, 5c, or 10c and increase your deposit the same amount each week. Or, you can begin with a certain amount, 50c, \$1.00, \$5.00, or any amount, and deposit the same amount each week.

**HOW TO JOIN**  
Look at the different Clubs in table below and select the one you wish to join, the 1c, 2c, 5c, 10c, 50c, \$1.00, \$5.00, or any of the clubs; then come to our Bank with the first weekly payment. We will make you a member of the Club and give you a Christmas Banking Club Book showing the Club you have joined.

It costs nothing to join and is an easy way to accumulate money.

**50c**  
**\$1.00**  
**\$5.00**  
or more  
will start you in OUR  
**CHRISTMAS BANKING CLUB**  
**COME IN; JOIN**

**THE REASONS FOR THE CLUBS**

To provide a way for those of moderate and even small means to bank their money.

To teach "the saving habit" to those who have never learned it.

To give young folks a practical education about money—by showing them that if they give up the little things they will be able to get the big things later.

To give you a "bank" and show you how our bank can be of service to you.

# TELEPHONIC STORM CAUSES HEAVY LOSS IN ONTARIO Western Ontario Worst Hit By Gale--Im- mense Damage in Cities

## One Man Killed in Toronto--Six Dead in Detroit--Shipping Safe

Although, according to the Meteorological office, the wind storm on Saturday night was not the worst Toronto has experienced, it reached a velocity of 80 miles an hour here, with which the meteorological office was unable to establish communication until 10 o'clock last night. The wind reached a velocity of 90 miles an hour. It is believed that in many parts the centre of the storm the velocity was greater than in any of the towns mentioned, but owing to the incompleteness of its reports the meteorological office cannot make any definite statement in this connection last night.

Toronto, Dec. 1.—One of the wildest storms that Ontario has ever experienced hit Toronto with a relentless grip for over four hours Saturday night, and when it had blown itself out, it left behind it a trail of destruction. Six persons were killed and many injured. The damage to property was estimated at \$1,000,000. The storm was the worst since the great one of 1907, which killed 100 persons and did \$10,000,000 worth of damage. The storm was the worst since the great one of 1907, which killed 100 persons and did \$10,000,000 worth of damage.

The storm, which swept from the north and west over London, carried the roof off the East London office of the London Art Woodwork Company, and caused heavy damage to adjoining properties. The Mitchell Co. in Chelsea, Green, on the west side of the city, was particularly unroofed, and a cottage under construction for at least three other houses under construction in different parts of the city suffered heavily.

Early during the evening the storm shifted the municipal arch of triumph erected on Dundas Street in front of the City Hall, in honor of the soldiers who returned from the front. The arch tilted to an angle that impeded street car and vehicular traffic, but two slender guy wires to nearby telephone poles held it up.

The Hydro Power service was interrupted repeatedly while the storm raged, heavy surges of power throwing out switches time and again at the local transformer station. The task of the staff and duty was made dangerous.

Uprooting or breaking off of trees in all parts of the city put hundreds of Hydro and telephone services out of commission, line gangs working all night and today and again to-night in an effort to remedy the situation.

Both C. P. R. and G. N. W. Telegraph Companies carried away the completely paralyzed east and west of London early in the night, while the London to-day, the loss to the London Hill Postage Agency and the Niagara Power Company, thousands of dollars.

The London and Port Stanley Railway was compelled to cancel two trains Saturday night, first because of power difficulties, and later because of the paralysis of the telephone dispatching lines due to trees falling over the right of way near Newmarket.

Part of the roof of the C. & P. S. roundhouse here was torn off, while the big car shunter at Grey Creek was shifted and saved from destruction with the greatest difficulty.

Damage to property at Port Stanley was very heavy. There the wind lashed the town into fury and swept down whole rows of small unimportant buildings along the boardwalk. Knolly, big brick partition adjoining the London and Port Stanley Railway, was unroofed.

Many summer cottages were also badly damaged, those on Orchard Beach suffering particularly. The cottage of F. W. Parcombe, civil engineer, of London, had its roof carried away.

MUCH DAMAGE AT GALT. Galt, Nov. 30.—Thousands of dollars worth of damage was done at Galt and vicinity Saturday night, the night the most severe gale that has been known in years. Two-thirds of the roof was blown off the Galt Hotel, and a section of the east wall blown over. The old gas works, and Galt and McLeod's store, and pattern shop were badly unroofed. At Preston a new addition to the Crown Furnace Company was unroofed, and heavy damage done. Trees were blown down, and many houses and barns were damaged.

Hydro men were out all day repairing the lines. The country road out of Galt was completely blocked with telephone poles, and many of the lines were down. A number of lines are reported to have been wrecked in the country.

The high winds continued all night and to-day. On Anlinie street Saturday night, Mrs. H. W. Spruce, street, was rendered unconscious when she was struck by a sign which fell from a house. She was seriously injured. Firemen had to call for a rubbish fire, but they made a quick response and checked the flames from spreading.

CHANNY BARNES PLATTENED. Guelph, Nov. 30.—For a great many years has a storm done as much damage to property as did the one which struck this city on Saturday night. Following an all-day heavy rain storm, a regular tornado hit the city about 8 o'clock in the evening. It came with terrific force right across the country and laid many buildings, trees, etc., low. Out in the country several barns were flattened while in the city the damage done was tremendous.

On Stranraer street, the roof of a big brick house was carried away and carried down the street, smashing a car and doing other damage. On the O. A. C. several valuable trees were blown down while in one or two directions, at least the roads are blocked by trees falling across them. Telephone and telegraph wires are down in all directions, but so far as can be learned no persons have been injured.

AT STRATFORD. Stratford, Nov. 30.—This city suffered damage to the extent of \$100,000 in the heavy windstorm which passed Saturday night, plunging the city into a severe snowstorm. The heaviest loss was in the city hall, where the roof was blown away and the city hall was damaged. The city hall was damaged to the extent of \$100,000.

The Hydro Power service was interrupted repeatedly while the storm raged, heavy surges of power throwing out switches time and again at the local transformer station. The task of the staff and duty was made dangerous.

## Bigger Business From Better Health

"WHAT is this notion you have about the health of employees?"

"It is one of the biggest benefits that is going to result from the war."

"Well?"

"What we think was the report of the draft board. Forty per cent. of the men examined were turned down as medically unfit. These men were from all classes, and since they were mostly young men, it stands to reason that a far larger proportion of our men would be in the 'unfit' class."

"We cannot help that."

"That is just it. We must help it if we are going to build bigger business and get more production we are after. What is the use of spending hundreds of thousands of dollars on the extension of buildings and then fill them with men who are not in a condition of health to do a day's work?"

"That is true. What was wrong with most of those called out?"

"Twenty-five per cent. were incapacitated because of nervous disorders. Malnutrition, the doctors said, was the cause of their condition. That way from childhood, perhaps. Their blood was thin and watery and their nervous system starved. As a

result they were easily tired and had no reserve force. They would catch cold easily and in fact be easy prey to any germ disease."

"What can we do?"

"We can see that they get half a day a week for outdoor recreation, and I am going to recommend the use of Dr. Chase's Nerve Food to these men. You know what the Nerve Food did for me when my nerves gave out. If I have my way it is going to have a good try out among the men, for there is nothing of a know that will build them up so well."

"You certainly should know after the condition you were in, for I sometimes thought you would never around."

"There are other ways we can help the men by better working conditions, but these are included in these building plans."

"Bigger business from better health" is my motto, and I know Dr. Chase's Nerve Food is going to help me carry out this program."

Dr. Chase's Nerve Food is so universally used that you can obtain it from any dealer for 50 cents a box, 6 for \$2.75, or from Edmonson, Bates & Co., Limited, Toronto. The portrait and signature of A. W. Chase, M.D., the famous Receipt Book author, are on every box of the genuine.

About 20 panes of glass in the James block were smashed by flying shingles from the Bowman House. Windows shatter in the north side of the King street met with a similar fate. The casing factors in the south end, owned by the Dominion City, are reported badly damaged.

Many other buildings in town and country have been damaged more or less by the continuous gale of wind. On several every street in town our finds trees blown down and four destroyed.

## AMBASSADORS

The northeast wing of the Dominion Organ & Piano Company factory was unroofed, the roof being blown across the street, where it landed on the roof of Mrs. William Nod's brick cottage. After smashing two large maple trees, strange to say, little damage was done to the cottage and not a pane of glass was broken. The metal part of the roofing was carried over Mrs. Nod's cottage and landed in a garden in the rear of the Methodist parsonage, a distance of 20 yards. The tower of the town fire hall was carried nearly the length of the building, falling on the north end of the hall, crushing in the roof and knocking out considerable of the brick wall.

The north wall of a new brick garage on King street, belonging to Luke Bop and Cyderman, in course of construction, was blown into the street.

Of injuries or accidents to individuals have been received, however, a regular storm, sought shelter from the storm and reached Port Huron this morning. The steamer W. S. White reached here tonight from Buffalo and reported no shipping in difficulty. Reports from about Huron points are meagre because of demolished conditions. Wires are down all over the State, and inter-urban electric car service is in bad shape because of the storm. Miles of telegraph lines being reported down.

## TAIL END AT WOODSTOCK.

Woodstock, Nov. 30.—A heavy windstorm swept over Woodstock and Deception on Saturday night, and did some damage. It was plenty severe enough, but it is understood that it was only the tail-end of a more severe storm which swept over the region of London and St. Thomas. Windows were blown down and smashed here, electric light poles on the street were blown down, and signs were uprooted, small sheds and sign boards were levelled, shingles were torn from the roofs of residences, and fences, etc., were blown away. The electric light system went out of commission for a time and some telephone and telegraph wires were also rendered useless for some time.

The area. Victory loan signboard, about twenty-five feet high and thirty feet wide, standing in front of the City Hall, was knocked to the ground and damaged. No reports

**ITS DIRT"**

and Pearl streets, reported that on Saturday night, his store was broken into. A large assortment of drugs, razors, soap, etc., were taken away by the marauders, who did not leave even a cent cash.

A housewife on N.E. 3rd street was startled by the thieves on Saturday evening, and a quantity of cloth stolen. Apparently no one else was disturbed, as the thieves enter no less than the building.

**Clothing Prices.**

Fralick & Co. are selling clothes day at less than replacement cost. have in our store to-day about 2000 garments at 25 to 50 per cent off to \$50. The fact is we purchase these garments "way back when armistice was signed, at a time we conscientiously believed that prices would fall, and when prices dropped far below the price paid. In other words, we are actually selling the whole store below the retail price.
